Hi,

Here are the books we'll be reading in the fall for 5371: Foundations of Technical Communication. Please purchase them online as soon as you can.

For the first MOO session, please be ready to discuss Chs. 4 and 1 in *Central Works.* If you want to read ahead, read Chs. 2, 3, and 6 as well. Ch. 6 will play an important role in the recommendation report you will write later in the term, so you may want to spend extra time on it.

I'll post a syllabus online and send you the link via email within the next month. In the meantime, if you have any questions, please let me know. I'm looking forward to a good class,

Sean Zdenek
